

Guiding Principles for Adults
Cité Primary School
– growing together –

All those involved in the learning and educational process
work together constructively to implement it.

We impart to our students the fundamental skills
that enable successful and responsible learning.

We contribute to the development of each child's personality
by accepting them with their strengths and weaknesses,
and by challenging and supporting them.

We ensure that our school is a place
where community among students, parents, and teachers
can be shaped and experienced.

Students, parents, and teachers
contribute to a learning-friendly
and trusting school atmosphere.

It is important to us that we all interact
with care, tolerance, and appreciation.

Particularly when dealing with digital media,
we value sensitivity and social competence.

We respect different languages
and cultural influences and value
fruitful coexistence.
